

Neuroinformatics combines neuroscience and informatics research to develop and apply the advanced tools and approaches that are essential for major advances in understanding the structure and function of the brain.

The International Neuroinformatics Coordinating Facility (INCF) coordinates international activities for discovery and innovation in neuroscience and related fields. Established in 2005 through the Organisation for Economic Co-operation and Development (OECD) Global Science Forum, the INCF fosters worldwide collaboration and data sharing in neuroscience in order to advance our understanding of the human brain and its diseases.

With its Secretariat at the Karolinska Institutet and Royal Institute of Technology in Stockholm, Sweden, the INCF achieves international outreach through its national nodes in 14 member countries.

## 2nd INCF Congress of Neuroinformatics

Pilsen, Czech Republic - September 6-8, 2009

The INCF has established an annual Neuroinformatics Congress to bring together scientists from different fields, under the common denominator of neuroinformatics. The goal of this Congress series is to provide a venue for interaction across academic domains, to facilitate dissemination of scientific results, and to foster a strong and vibrant neuroscientific community with broad international scope.

Spread the word and join us for Neuroinformatics 2009!

### INCF Secretariat

- coordination of tasks
- analyses and recommendations
- infrastructure developments
- international, interdisciplinary training
- standards and guidelines
- portal to resources

### INCF National Nodes

- national infrastructure
- national training
- dissemination
- contributions to coordinated efforts
- specialized developments

### INCF Member Countries

Belgium	The Netherlands
Czech Republic	Norway
Finland	Poland
France	Sweden
Germany	Switzerland
Italy	United Kingdom
Japan	United States
